SUMMARY

Backend Software Engineer with **4+ years of experience** building high-throughput, event-driven microservices in **Java 17/21 and Spring Boot**. Cut API response times by **60%** via materialized-view architecture and shipped production systems on **Azure Kubernetes Service (AKS)** using **GraphQL, REST APIs, Cosmos DB, MySQL, and Kafka**.

EXPERIENCE

Java Backend Developer — Warehouse

Cognizant

Jan 2024 – Present

Kochi, India

Project: AutoScheduler

- Designed an **event-driven solution** using **RisingWave DB materialized views** to replace legacy dependencies, cutting API response times by **60%** across all warehouse sites.
- Built and shipped **multiple production microservices** in **Spring Boot 4 and Java 21** supporting event-driven architecture for real-time data transformation.
- Automated **Cron-triggered API jobs** for real-time data synchronization across warehouse systems, reducing manual testing effort.
- Deployed production microservices to **Azure Kubernetes Service (AKS)** via **Argo CD (GitOps)**, integrating **Azure Key Vault** for secrets management, with monitoring and logging for reliable operations.

Project: IWMS (Intelligent Warehouse Management System)

- Delivered an end-to-end warehouse picking solution: **ReactJS** front-end integrated with **GraphQL APIs**, backed by **Cosmos DB** source containers for real-time operations.
- Led a POC evaluating replacement of **Apache Kafka** consumers with **RisingWave** materialized views for real-time analytics and infrastructure cost optimization.

Backend Developer — Transportation (Middle Mile)

Cognizant

Sept 2022 – Dec 2023

Pune, India

- Developed backend **REST APIs and Kafka consumer services** in **Java 8** using a **microservices architecture**, with **Cosmos DB** for backend data storage.
- Deployed and managed services on **Azure**, enabling integration with a **driver-facing dashboard UI** consumed by the frontend team.
- Collaborated cross-functionally to expose backend APIs consumed directly by the **drivers' dashboard**, supporting real-time transportation operations.

EDUCATION

B.Tech, Computer Science and Engineering

Technocrats Institute of Technology

June 2018 – June 2022

CGPA: 8.5

TECHNICAL SKILLS

Languages: Java 21, SQL

Databases: Azure Cosmos DB, MySQL, RisingWave

Architecture & APIs: Microservices, REST, GraphQL

Cloud & DevOps: Azure, Kubernetes (AKS), Argo CD, CI/CD

Practices: Agile/Scrum, Unit & Integration Testing

Frameworks: Spring Boot

Messaging: Apache Kafka, RisingWave

Frontend: React JS

CERTIFICATIONS & ACHIEVEMENTS

- Microsoft AZ-900 (Azure Fundamentals)** — Credential ID: 9EEEC2B116CDC2CF
- Runner-up, Codex Hackathon (Cognizant)** — engineered SDLC automation agents to streamline development workflows and boost efficiency.
- Associate of the Month** — awarded by the Head of Delivery for innovation and proactive problem-solving.
